INTRODUCTION

Hello and welcome to the eBook '26 Plays to Dominate Your Competition'.

For those who don't know me yet, let me share a little about myself...

My name is Trevor McLean and I own and run the blog www.basketballforcoaches.com.

I have been a passionate basketball coach, player, and fan for many years.

It seems like just the other day when I first begun coaching. I thought I knew a lot about the game at that time, but little did I realize how much more there was I needed to learn.

One of the biggest areas I had trouble in was finding the right plays that suited the teams I was coaching. This was hard at first, but through hours and hours of studying and trying out a lot of different plays, I eventually started to see which plays worked more than others.

In this eBook I'm going to share with you the 26 plays that I believe will lead any team to a lot of success.

Do I expect you to memorise and use them all? Of course not. As you're going through the eBook, I encourage you to pick out your favorites or write down which ones you like for future reference.

My goal is to provide you with an eBook that you can refer back to any time you need new plays.

The plays I'm showing you aren't ones I made up on my own (although I've made adjustments to many of them). They're tried and tested plays by many coaches all over the world coaching many different age groups.

Hopefully you find a few that you like that work for you!

I wish you the greatest success in your future coaching endeavours.

Now, let's jump straight into the 26 plays that will allow you to dominate your competition!

How To Read The Diagrams

1 This number indicates the offensive team and which position the player is. The number will be between 1 and 5.

The circle around the number shows the player that has the ball. It will be a number between 1 and 5 and will obviously be on the offensive team.

When a number is surrounded in a black circle this shows that they are the defensive team. They will only be shown on the 2-3 zone plays.

A straight, full coloured line means a cut. This will be the offensive player moving without the ball.

A dotted line means the player is passing the ball.

A zig-zag line means the player is dribbling the ball.

A line that ends with another line blocking it means the player is setting a screen.

BASELINE PLAYS

BASELINE PLAYS

Cross-Screen

Frame 1

Starts in a box format. This is a very well-rounded play that creates many opportunities to score.

The most important thing is to put your best decision maker as the passer. This is because two out of the three options are close to the key so the pass will need to be fast and accurate.

(1). 4 sets screen for 5.

(2). 3 sets screen for 1.

Frame 2

(3). 5 uses the screen and looks for easy pass in and score.

Option One - Pass to 5 using the screen.

(4). 4 opens up to the ball immediately after setting the screen sealing 5's man behind him.

Option Two - Pass to 4 sealing 5's defender.

(5). 1 uses screen and pops to the 3-point line to look for shot.

Option Three - Pass to 1 for 3-point shot.

(6). 3 pops out for the safety pass if no one else is open.

Diagonal Option

Frame 1

Starts in a box format. This play is designed to get either one of your two big men and easy shot near the basket.

Most important that you have your best passer passing the ball in.

(1). 4 up-screens for 3.

(2). 3 comes off the screen looking for the easy layup. If it's not there, 3 goes to the corner.

Option One - Pass to 3 on cut.

Frame 2

(3). 5 sets a diagonal screen on 4.

(4). 4 uses screen and looks for easy layup.

Option Two - Pass to 4 using the screen.

(5). 1 goes back for the safety pass.

26 PLAYS TO DOMINATE YOUR COMPETITION

Frame 3

(6). After setting the screen for 4, the 5 seals 4's defender and rolls to the basket.

Option Three - Pass to 4 sealing 5's defender.

Screen Both Sides

Frame 1

Start in a box format. This play is designed specifically to get your best shooter an open jump shot from either wing.

As the inbounder is the one that shoots, it's important that your best shooter inbound the ball.

- (1). 2 passes to 3 who v-cuts to receive the ball.
- (2). 3 passes to 4.
- (3). 4 passes to 1.
- (4). 5 steps to the short corner.

Frame 2

(5). After passing to 3, 2 now walks his defender slowly underneath the basket.

- (6). 3 and 4 set a double screen.
- (7). 5 also sets a screen on the other side.

26 PLAYS TO DOMINATE YOUR COMPETITION

Frame 3

2 now has two different routes he can take.

(8a). 2 can choose to use the double screen and curl or flare for a jumpshot.

(8b). Or 2 can choose to use the single screen and curl or flare for a jumpshot.

Frame 4

(9). 1 must read 2's movements and dribble to create the correct passing lane.

(10). 2 gets an easy shot.

Option One - Pass to 2 for the shot.

Back Double

Frame 1

This play is designed to get your best shooter open for the jump shot. In this example, the best shooter on the team is the 1.

BASELINE PLAYS

VS. 3-2 ZONE

BASELINE PLAYS VS 3-2 ZONE

Stack

Frame 1

Start out in a stack formation.

This play will work best if you have a big man that can consistently hit a mid-range jump shot.

(1). O2 flashes out to the corner forcing D4 to respect the 3-point shot and deny the inbounds pass to O2.

Option One - If D4 doesn't respect O2. Pass to O2 for shot in the corner.

(2). O5 screens D5 deep in the key.

Frame 2

(3). O4 should be able to step right into an open jump shot.

Option 2 - Pass to O4 for the open jump shot.

(4). O1 steps back as safety.

Stack Variation - 3 Pointer

Frame 1

This is a variation to Stack to get a three-point shot instead of a mid-range jump shot.

Your best shooter should start at the top. In this example, 1 is the best shooter.

(1). O2 flashes out to the corner. This forces D4 to respect the 3-point shot and deny the inbounds pass to O2.

Option One - If D4 doesn't respect O2. Pass to O2 for shot in the corner.

(2). O5 screens D5 deep in the key.

(3). O4 screens D1.

(4). O1 steps behind the screen set by O4.

Option Two - If D1 doesn't get through O4's screen.

Pass to O1 for the 3-point shot.

Frame 2

(5). If the D1 does get through the screen by O4, O4 will find that he has a lot of space.

Option Three - O4 steps in behind the screen set by O5 for the easy jump shot.

Rollers

Frame 1

This play is designed to get your big men shots close to the basket.

The works best with big men with good catching skills. And the person inbounding the ball should be your best passer.

Also, It doesn't matter who screens out of O4 or O5.

Get your players to talk before the play to switch it up.

(1). Both O1 and O2 cut out to the corners. This will force D4 and D3 to respect the shooters.

Option One - If the defence doesn't play honest against either O2 or O3, pass to either for a shot in the corner.

Frame 2

(2). O4 screens O5.

CONCLUSION

Some of these plays have their original names... some are plays that I have changed the names of and have included them in this eBook under that name. You can change them to anything you want.

In fact, you should change their names. A lot of the plays are named after what is happening in the play. I did this so that you could remember them easily.

I sincerely hope you've gained a lot from this eBook.

My advice is to print it off and keep it in a folder so that you'll be able to reference back to it whenever you need to.
